Solutions for Dairies

In use worldwide, in all climates!

- **Flush Systems**
- **Manure Separators**
- **Pumps**
- **Aerators**
- **Controllers - manual and automatic**
- **A full line of complimentary components**

Solutions that:

- **address your dairy's special needs**
- **are low maintenance**
- **operate economically**

Manure Separators

- MK IV—Static screen
- MK V—Twin static screens
- Extractor—No pumps
- HS II—Scraped manure
- Stacker—Mates to our static screen models

Flush Systems

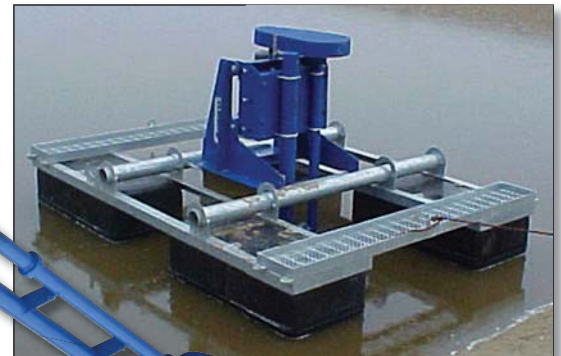

- Pop-up Discharge valves—Up to 10,000 gpm
- Fixed Discharge Models—Louvered or solid lids, air or manual operation
- Rotatable Discharge—Turns a full 360°
- Sand Handler Valves for sand bedding

Your choice of over 25 flush valves, tanks, and dams to suit your needs!

Pumps and Agitators

- Transfer Pumps—Simple slurry movement
- Chopper Pump—Heavy duty with exclusive triple cutting action
- Floating Flush—Pumping from lagoon to flush system
- Agitator—hydraulic agitators for pits and lagoons
